DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/27/2010 has been entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney Beverly Bunting on 1/28/2011.

The application has been amended as follows:

Claims 5, 10, 14, 16, 24 and 26 have been canceled.

3. The following is an examiner's statement of reasons for allowance: the prior art of record has failed to suggest either singly or in combination a novel seating system for a

vehicle having a seat with a seat bottom and pivotally mounted seatback that can move between a generally vertical seating position and a generally horizontal stowed position wherein the seat has a positioning system for moving the seat between these two positions, the system having a first actuator disposed proximate an upper corner of the seat back and a second actuator disposed proximate a lower corner of the seat and coupled via an elongated connection member to the first actuator and configured to actuate the first actuator, and further comprising a rotary retraction device having a torsion spring and a cord coupled to the second actuator to return it to a stowed position.

4. The prior art nearest to the applicant's invention is best shown by Benoit '153. Such a device teaches a seatback movable between seating and stowed positions, having first and second actuators connected to each other and disposed proximate the upper and lower corners of the seat back, but fails to teach a rotary retraction device including a torsion spring and a cord. Replacing the return device shown by Benoit would not be an obvious modification to the device as such a modification would introduce unnecessary additional complexity to the device of Benoit.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jach et al., Rink, Matsushashi et al. and Ainsworth et al teach folding seats of interest.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NOAH C. HAWK whose telephone number is (571)272-1480. The examiner can normally be reached on M-F 9am to 5:30pm.
